FlaskConf 2023

Third Edition
26-28 May, 2023
Rio de Janeiro - RJ
https://flask.python.org.br

Flask in Brazil

Flask Conf in Rio will be the third edition for the brazilian Flask developers community, a microframework built in Python used for web app development. It is widely used in companies for its simplicity, the fact that it is heavily supported by the community and the amount of information available on the internet about the framework. It is a stable, easy to use framework.

In both of the past editions of the event, held in São Paulo (2018) and Florianópolis (2019), we had more than 100 attendees, and Rio was chosen due to its good presence of Python developers and companies in the city.

Engage with the community

Sponsoring this event will show your company's engagement with the community.

This is useful as it will give your company visibility across the developers of the framework, and it'll help you to share your company's name and brand in the right groups.

Give back to the community

Giving back to the community is a good form of helping keeping the community growing and Open Source world working.

Open source normally needs a great deal of work that is mostly invisible to most people, and by supporting events like Flask Conf you give back to the community that works hard to maintain a great deal of edge technology that supports your company's ecosystem.

Amplify your network

Amplify your contact network, meeting possible new partners. Other entrepreneurs will be there, and you will get to know companies using Flask in your area, which you can leverage to create great connections with people that care about the same technologies that you do.

Find people with expertise in the technologies you use

We know how hard it is to find people with knowledge and expertise in a particular technology or framework, and at Flask Conf all attendees have already one interest in common: Flask.

Your chance to find people to hire or connect with that are just right for your company is increasingly bigger in a targeted event like this one.

Sponsorship Plans
